The Cupboard Door Company Expands Systems & New Product Offering

juliet | November 4, 2014

The Martin T27 Flex Spindle Moulder

The Cupboard Door Company has invested in an automated production management system, assuring deadlines are met and a smoother flow throughout the production process, and a Martin T27 Flex Spindle Moulder, to enable more efficient moulding and profiling and ensure consistent top quality. Newly-launched products include curved doors and cabinets and impermeable doors suitable for kitchen and bathroom. The office team has expanded to manage the growth in enquiries.

Established for over 25 years, The Cupboard Door Company Ltd is a specialist UK manufacturer of traditional doors in solid MDF, supplying ranges of lay-on doors and in-frame doors to kitchen and bedroom manufacturers, showrooms, architects and interior designers, across London, Sussex and the UK. Custom kitchen and bedroom doors are manufactured from one solid piece of high impact moisture resistant board (MDF), which means no joints or cracking, and the door ranges are available in any size in raw, primed or painted finishes.

For further information email them at sales@cupboarddoor.co.uk, view the website www.cupboarddoor.co.uk, or follow on Twitter at [@CupboardDoorCo](https://twitter.com/CupboardDoorCo)
