

Stylish contemporary kitchen featuring in-set beaded frame with traditional shaker door, The Cupboard Door Company

Cupboard Doors – Perfect for Painting from CDC

Offering the perfect paintable cupboard door solution, The Cupboard Door Company launches impermeable doors perfect for kitchens and bathrooms manufactured from Tricoya® which comes with a 50 year guarantee on the core material.

Manufacturing quality MDF doors to order, The Cupboard Door Company specialises in one-piece construction of handcrafted raised and fielded panel doors and drawer fronts, Shaker framed doors and inset frame systems.

Through substantial investment in CNC technology and clever adaptation

of manufacturing techniques, even traditional five-piece doors and in-frame doors (complete with frame) are made from one solid piece of MDF, in any size up to 2420 x 1200 mm.

If your customer's kitchen is in a painted style, you can be sure every door will be perfectly square for a perfect fit every time and there will be no movement or cracking of the finished door.

British Ceramic Tile set to unveil fashion-forward collection at kbb

British Ceramic Tile will be returning to kbb at the May Design Series this year, unveiling a tile collection like no other. A fashion-forward collection of wall and floor tiles, this new designer collaboration is set to remain under wraps until it's launched on the first day of the show.

Alongside this will be a selection of new and existing collections, together with the company's designer collaborations. The tile displays in different room settings will include Function & Form Hex, Conran, HD Slate, Feature Floors and Impact glass.

British Ceramic Tile will be offering 10% off all stock orders taken at the show for new customers who complete an account application on the day and existing customers ordering new product lines. In addition, any retailer interested in installing British Ceramic Tile's HD

collection in a fixed kitchen or bathroom display will receive 50% discount off the trade price, along with free fitting.

Visit the team on stand E200.

New Products

3D interactive with Virtual Worlds at Logicom

Virtual Worlds is at the forefront of 3D interactive CAD technology for the KBB sector. It will be demonstrating its market leading CAD software, Virtual Worlds Professional 5.9. Visitors can see for themselves how simple it is to create initial designs, learn all about the latest App technology, Web Viewer and advanced functionality, including sophisticated lighting effects and time-saving, automated short-cuts.

The company will also be taking a look into the future and showcasing

prototypes of revolutionary new 3D technology, which could become an integral part of the KBB showroom of tomorrow. Virtual Worlds invites visitors to trial new interactive technology and provide feedback to help shape the next generation of CAD.
